

SUPERHOG

SUPERHOG Software Engineer – Front End

About Us

At Superhog.....

We are a place where a diverse mix of talented people want to come and do their best work and most importantly feel included and welcome. We foster an environment that allows people to share, engage, learn, support, participate and work towards positive change.

The Role

Software development is at the core of our business and has been key to our success and growth. We are now looking for more amazing engineers to join our team and help us build the best insurance product out there!

We are a small but growing team. Our software engineers are given the freedom and autonomy to make empowered decisions, research new technologies, and learn and share knowledge with their peers. Our projects involve the whole software stack and vary between developing software for both internal and customer-facing use. You will be involved right from conception through development and testing to delivery and post launch support.

Our recent projects

- An internal claims management system for our Customer Resolutions Team
- A new verification system that checks guests
- A new product that validates guest identity
- A new tool for validating host properties

www.superhog.com

Our Stack

- Angular 8
- C# (.net472/.net Core) backend
- REST APIs
- SQL Server and Entity Framework
- CosmosDb
- Azure as our Cloud Provider

About you

We are looking for a Front-End Developer. We would love for you to apply if...

- You have a few years of experience with Front End Web Development
- You have a real passion for your work and are open to new learning opportunities
- You want to play an active role in a rapidly growing product
- You enjoy working as part of a team and are happy to get stuck in from day one
- You are happy sharing your experience and knowledge with the team
- You enjoy diving into challenging problems

What you'll get in return

- Competitive base salary
- The chance to work for one of the fastest-growing trust & safety companies in the UK
- An opportunity to pilot new ideas that impact the growth and direction of the business

Information, timings, duration & location:

- Start date: anytime from June 2022
- Full time
- Salary negotiable on experience
- This can be a remote position
